

Wordle

1. Open up **Internet Explorer** and go to <http://www.wordle.net/create>.

2. Type or copy/paste your text into the box provided and click **Go**. As an alternative, you can also use the URL of a website to include all of the text found on that page (instead of clicking **Go**, click **Submit**).

3. You will now see your **Wordle**. You can change the **language**, **font**, **color**, and **layout** by clicking on the appropriate links. If you want to let the web application shuffle those factors for you, click **Randomize**.

4. If you want to print your **Wordle**, click **Print** (and accept the printer applet warning). If you want to take a screen

shot of your **Wordle**, click on **PrtSc**, then paste it into a **SMART Notebook** File, **Word** document, or **PowerPoint** presentation (**Word** and **PowerPoint** will allow you to crop your screenshot).
